

Personal marketing plan works design engineer Klimov IG  
for 2014-2019 gg to create complex «POTRAM»  
from light-duty equipment "Prometheus" for recycling and minerals.

**The purpose of development:** the creation of mobile systems "Prometheus" to obtain from various waste material commodity petroleum and gas for the needs of industries and municipalities.

Igor Klimov G.

**Design engineer Klimov IG developed the following small-scale installations:**

1. A modular evaporator petroleum feedstock to produce ultra-pure fractions.
2. Modular capsule installation "The Kid" to any pyrolysis of carbonaceous and organic waste.
3. Modular installation of continuous action "Prometheus" for any pyrolysis of carbonaceous and organic waste.

**The possibility of using plants "Prometheus"  
for the pyrolysis of solid hydrocarbons.**

Sludge processing, cleaning contaminated soil, elimination of oil sludge and oil spills cemeteries, recycling of waste drilling fluids and drilling mud.  <i>Process temperature - 800°C.</i>	Processing of municipal solid waste.  <i>Process temperature - 1200°C.</i>
Pyrolysis of solid hydrocarbons. Production of liquid fuels from coal mining, bituminous shale, peat.  <i>Process temperature - 450°C.</i>	Getting biofuels from wastes of livestock enterprises. Biodiesel.  <i>Process temperature - 350°C.</i>

**The economic component of cooperation with the customer complexes «POTRAM».**

1st stage. Initial cooperation. Job designer Klimov IG to create a design development 11.2% of the purchase price + travel expenses.

2nd stage. Continued cooperation. Job designer Klimov IG for controlling the operation of the facility, improving the parameters of its operation 11.2% of the profit-sharing facility.
